Dear Hiring Manager,

I am writing to express my strong interest in a Chief Accountant position within your organization. I bring more than twelve years of hands-on experience in accounting across the financial, construction and contracting, hotel, and engineering-consultancy sectors in Saudi Arabia, Egypt, and Kuwait.

Throughout my career I have managed complete accounting cycles — preparing and closing financial statements, supervising accounting teams, running payroll, and monitoring receivables and payables — while always delivering accurate, timely reports that help management make sound decisions. I also work confidently with Saudi government platforms, including ZATCA, Muqeem, Qiwa, and Mudad, to ensure full regulatory and financial compliance.

I take pride in delivering real results. I have improved budgeting systems and reporting accuracy, reduced financial losses through careful analysis of revenues and expenses, and consistently closed final accounts on time in line with international standards (IFRS). I am also a registered Accounting Technician with SOCPA, the Saudi Organization for Certified Public Accountants.

Known for my attention to detail, analytical thinking, and team leadership in fast-paced, multi-sector environments, I am confident that I would add real value to any organization I join.

I would welcome the chance to discuss how my experience fits your needs. My CV is attached, and you can find more details on my online portfolio. Thank you for your time and consideration.

Kind regards,

Yehia Kamal El-Din
